

Marshmallow Snowmen

Ingredients (for 12 snowmen)

- 4 oz white candy coating
- 24 large marshmallows
- 12 long wooden skewers
- coloured fruit leather
- 12 pretzel sticks
- 4 oz chocolate candy coating or coloured writing icing

Methods

1. Melt the white candy coating in a microwave-safe bowl. Once melted and smooth, glue two marshmallows together by spreading a dab of melted coating between each of them. Place the snowmen on a baking sheet and refrigerate briefly to set the coating.
2. Thread a long skewer through each snowman, stopping before it extends through the top.
3. Slice the fruit leather into narrow strips about 4-5 inches long and wrap each one around the snowman bodies, underneath the heads.
4. Cut the pretzel sticks in half, and dip the ends in the melted coating. Press two pretzels into opposing sides of the marshmallow for the snowman's arms.
5. Melt the chocolate candy coating in a separate bowl in the microwave. Dip a toothpick in the coating, and dab small dots of coating onto the snowman to represent the eyes, mouth, and buttons.
